ARCHITECTURE AWARDS 2016

BUILD

Cosmic Construction & Build Company has won **BUILD Pioneer Award for Conceptual Architecture & Design & Most Innovative Swedish Survival Case Study: Sea Houses**

During spring 2016 I received an e-mail from the BUILD Magazine. They let me know that my company, Cosmic Construction & Build Co had been nominated for the 2016 Architectural Award. After some hesitation I acknowledged the nomination. Then I received their decision and motivation, see above. This Architectural Award is an acknowledgement of many years of work regarding the "Survival Project" connected to the ongoing terrible natural catastrophes we all face.

Who Reads Build?

Build is read every month by a worldwide network of more than 332,000 dedicated and informed industry experts! The monthly magazine.

ARCHITECTURE AWARDS 2016

The buildings and structures we live in and encounter shape the way we view the world, and therefore the Architecture industry has an important role to play in shaping the world as we know it. Innovation, dedication and creativity are all key to success in this competitive and dynamic sector, as client's demand increasingly new and expressive creations that do more than reflect the current industry trends.

The 2016 Architecture Awards have been put in place to highlight the amazing work done by the talented designers, artists and visionaries whose talent and innovation have created talking points that will span generations. These awards disregard geography and business size, and any one from individuals to multinational Corporations can be nominated. It is not just architects who are eligible for the programme, everyone involved in the industry can be voted for, from architectural technologists, products suppliers, software developers and more.

Winner's Announced! Please see below the Supplement and Full List of Winners

Cosmic Construction & Build Company

BUILD Pioneer Award for Conceptual Architecture & Design & Most Innovative Swedish Survival Case Study: Sea Houses

BUILD Magazine's 2016 Architecture Awards

Cosmic Construction & Build Co.

Survival Project

A unique long-term step-by-step plan which concerns the whole world. A request from Nature. A preparation to avoid the worst scenario.

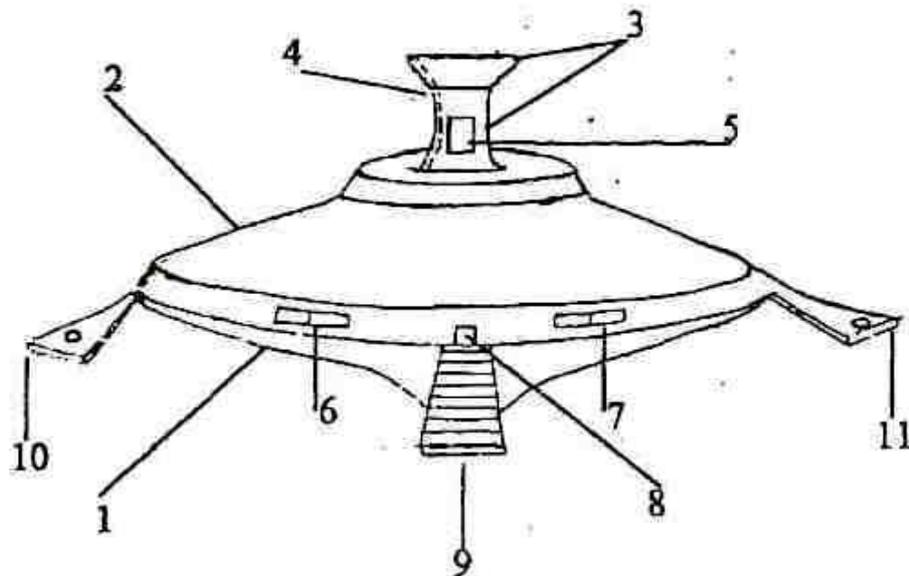

Case study

Cosmic Construction & Build Co. was founded in 2002 by me and my sister, based on my patent: *A Sea House with a body on pylons which are not anchored to the ground to make it possible for the house to float during floods.* The patent was granted on March 19, 2004, in Stockholm and corresponds to the ancient Ark.

Summary:

A seahouse consisting of a lower level (body) (1), a middle level for daily life (2) and cylinder-shaped terrace and landing place for small light helicopters (3). It rests on four equally tall adjustable pylons (9, 10, 11, 13) which are free from the ground on a sturdy concrete platform which is firmly anchored to the ground.

When water levels caused by floods and heavy rainfall rise, the Sea House will be elevated by the water to float on the surface like a boat. Two pylons anchored to the ground (16, 17) keep the Sea House in place.

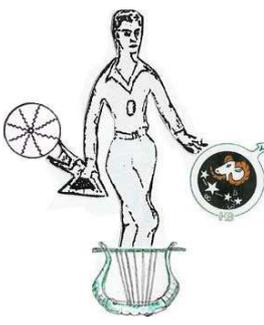

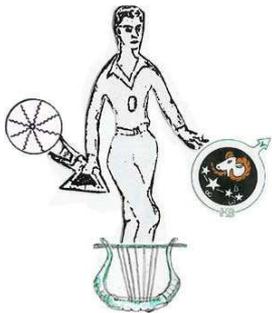

In that way both the Sea House and all belongings will escape from danger. All technical connections, i.e. electricity, water, sewage system will automatically switch off at a pre-determined water level.

Thanks to the form of the invention and glass and plastic fiber reinforcement, the Sea House will resist hard winds and earthquakes.

The first Sea House model is at the Swedish Patent and Registration Office in Stockholm.

Adapted to, for example, floods, hurricanes, earthquakes and fires

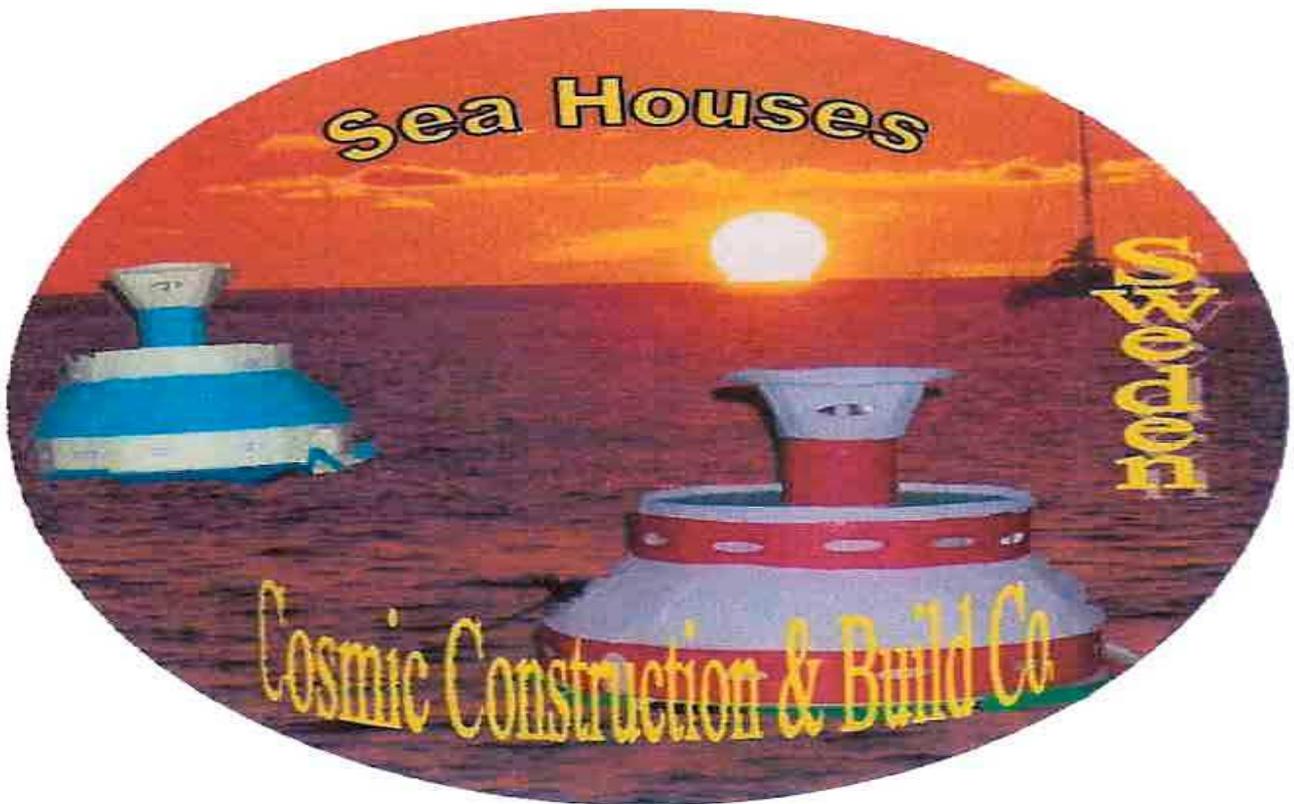

These pictures illustrate the good qualities of the Sea House. Now time is ripe to introduce this Sea House on the world market in order to save as many lives as possible. More info at *Now it is time to rebuild the Ark.*

Models demonstrating floating apartment buildings.

Nostradamus - Quatrains
Century 2, Quatrain 41
The great star will burn for seven days,
The cloud will cause **two suns** to appear:
The big mastiff will howl all night
When the great pontiff will change country.

Nostradamus writes about two suns, Nemesis and the Sun. Then the whole world will see them with their own eyes.

Nostradamus also writes about the gigantic global warming and that climate change takes place because of the binary star system and the Sun's partner, a neutron star, which has already joined the solar system and will soon appear in the sky. Nostradamus, above, is very clear about this.

Cosmic Construction & Build Co was founded on my patent. In Sweden there is financial aid for new businesses via a state finance corporation. My company is registered. I have submitted an application three times to be able to build a prototype of the Sea House, but my application was rejected. I have also tried to find partners, a number of them, but to no avail. While waiting I built around 80 different Sea House models (as those above); apartment buildings and sports arenas, together with my sister with our own money. Some models float. The company has a website since 2003 which presents activities and science concerning climate and natural catastrophes but also personal history which coincides with my family tree, a website at a high level of knowledge. A simple but unique company website on this planet. The company has no mortgages and no debts.

Knowledge is worth a lot of money and is important as a balance in this context.

The main goal is the **Survival Project**, an extensive program for step-by-step planning. In this project you need to see what is happening right now as well as what will happen in the distant future, to able to cope with the extensive natural catastrophes we are facing. The Sea House is an important part of this strategy, and my company is ready. I hope to find like-minded partners, since we are all in the same boat....

21-05-2016

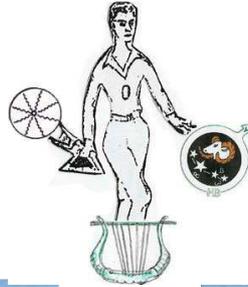

Kind regards,

Josef Kemény

The Survival Project is a unique, long-term gradual planning activity which concerns the whole world, i.e. global planning in connection with various natural catastrophes. They are already here and become worse and worse year by year. The Survival Project is for Life which cannot be sold out, it can only be guarded and prolonged and we will see the result when time is ripe. A new type of global industry, for example, will also join in...
