On the Road of Life

18/04/2017

18/04/2017

Thomas's Top-level Gnosticism

Life. This word is important to all the world, irrespective of religion. I primarily refer the reader to the following links: *The Secret of the Black Hole*, *What happens in a Black Hole?*, *Voyage Through the Black Hole*, *Life and the Black Hole*, and *The Battle of the Kingdom of Death*. Note that I, in this context, use available material and interpret it according to my knowledge.

We know that wealthy people on this planet can buy almost anything, with one exception: Life, nobody can buy that. Life at a high level is guarded by nature. Unauthorized individuals are not allowed to enter the prolongation of Life. Regardless of how rich you are, if you are not a good Human being you will get nowhere.

The so-called "Black hole" at the centre of our galaxy is an insurance by nature to stop unauthorized people from getting access. Otherwise no life or no world would be created because the gods and evil beasts annihilate everything, even themselves, by warfare. Therefore, they are not authorized to have a Life at a higher level.

In science the most important study object is still the black hole. It is getting more and more popular for astronomers and other scientist year after year.

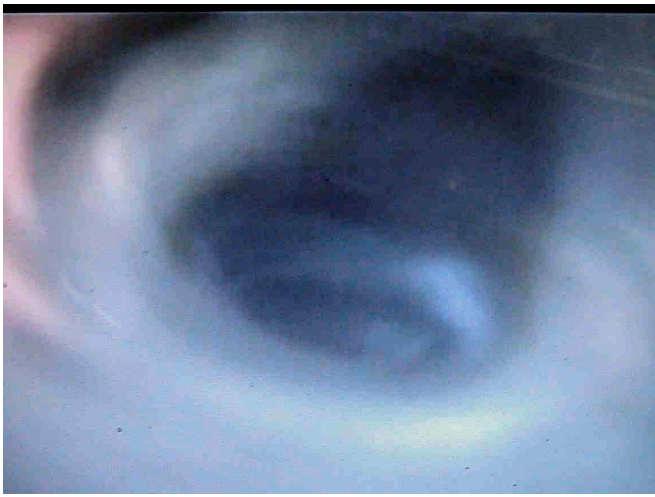

Our galaxy the
Milky Way seen
from its side

Our galaxy the
Milky Way seen
from above

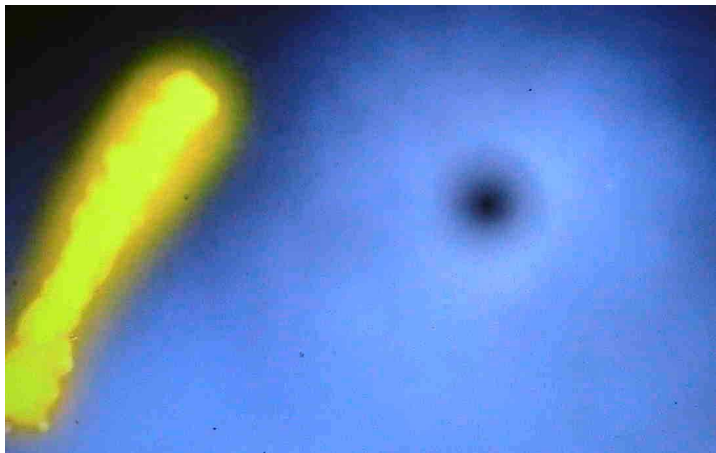

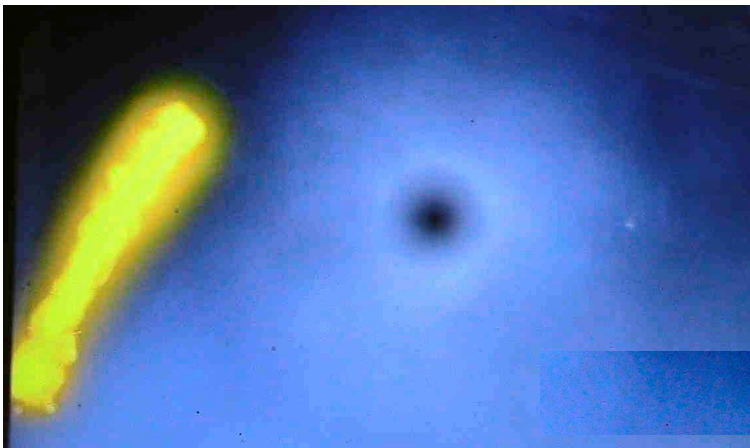

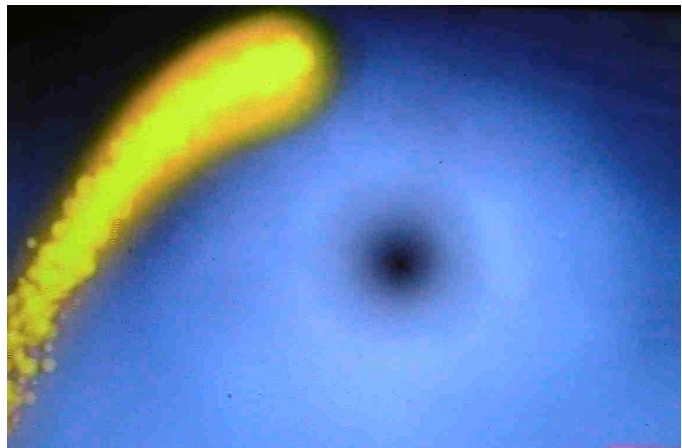

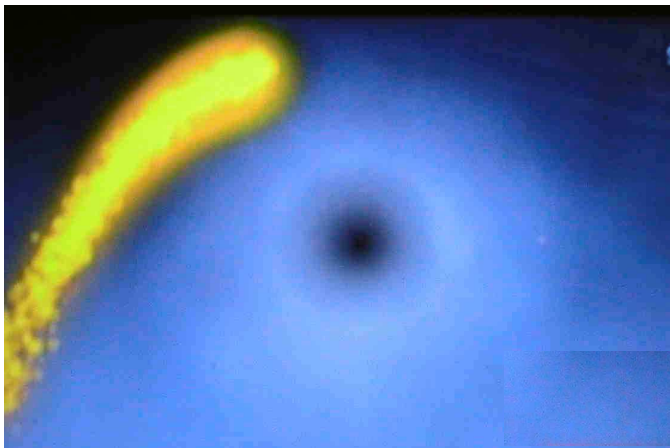

Astronomers call this position around the black hole the "event horizon." There the celestial bodies gather after having been caught around the black hole. They latest discovery is from the beginning of 2014 when scientists managed to show how a celestial body, a star, is caught into the so-called event horizon and accelerates into the galaxy's nucleus via the black hole.

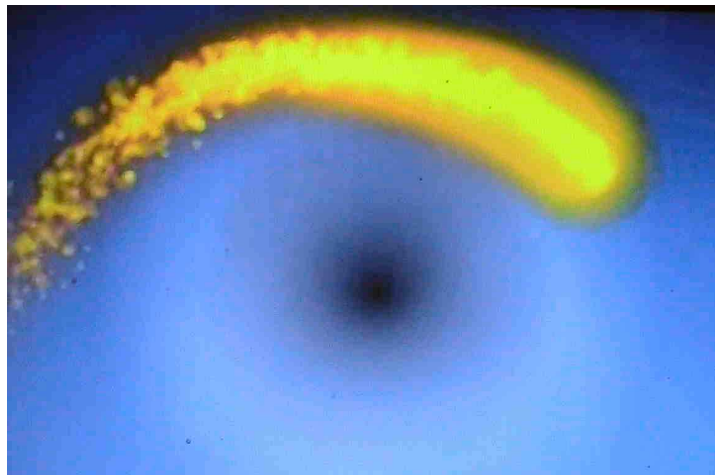

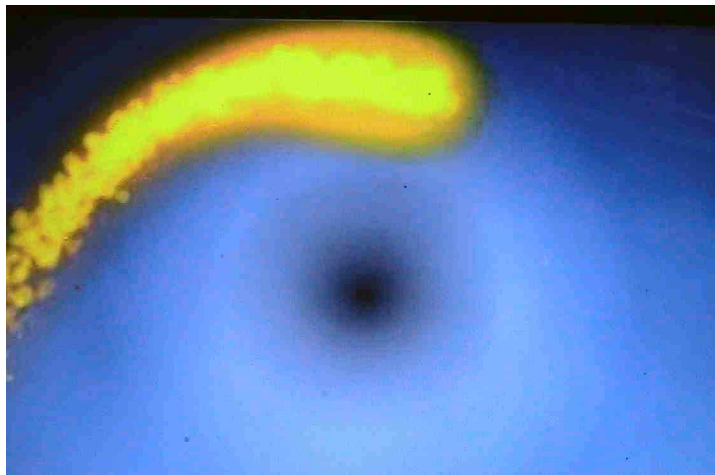

The pictures show how a so-called living celestial body enters the event horizon starts a serious acceleration.

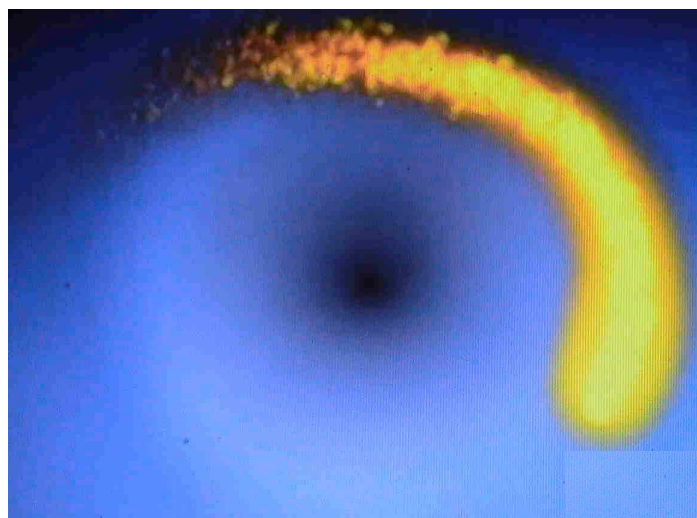

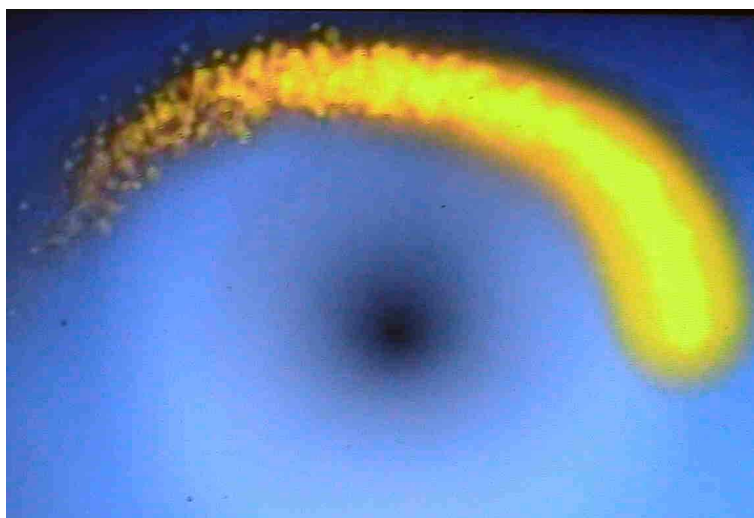

The acceleration continues in the event horizon

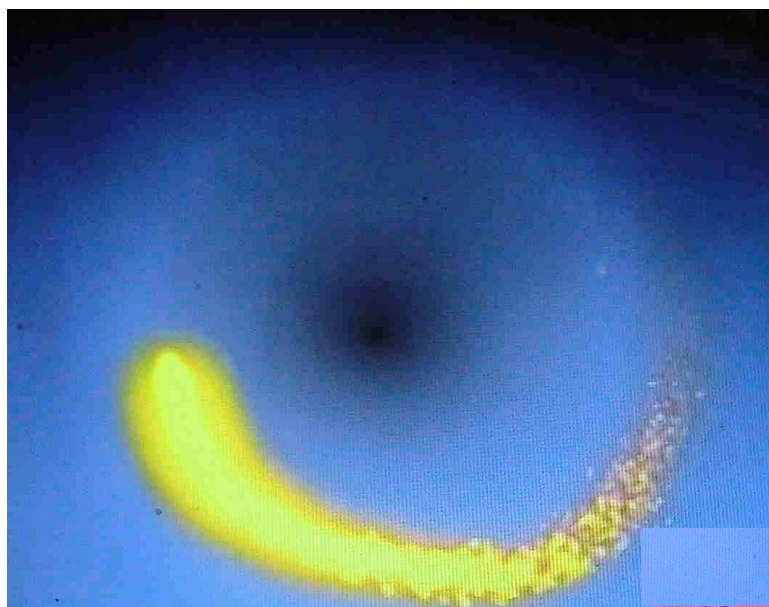

The living celestial body continues its voyage while increasing its velocity

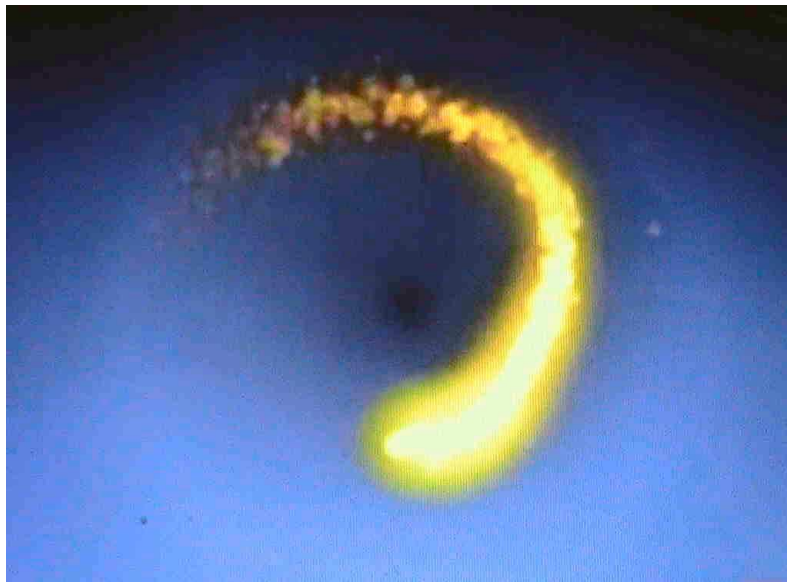

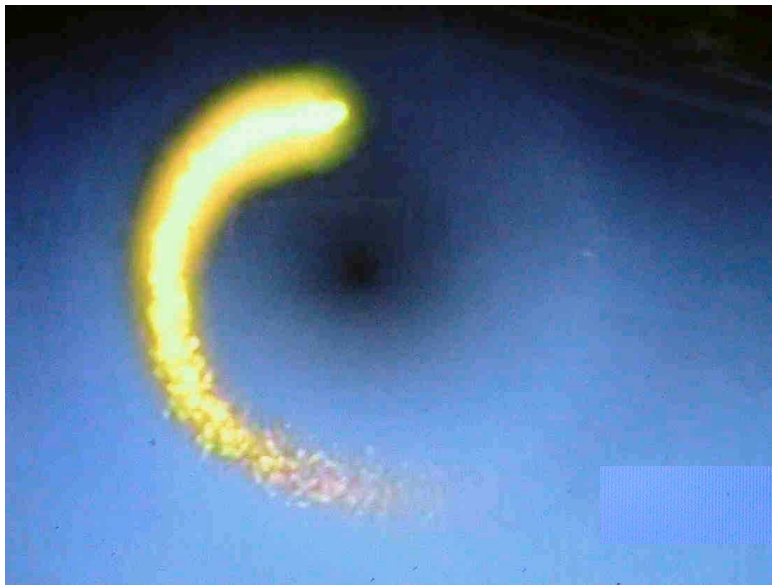

...closer and closer to the black hole at top speed

During the voyage, matter starts to transform into a different level of frequency, the colour of the celestial body is also changing.

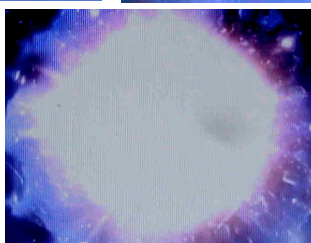

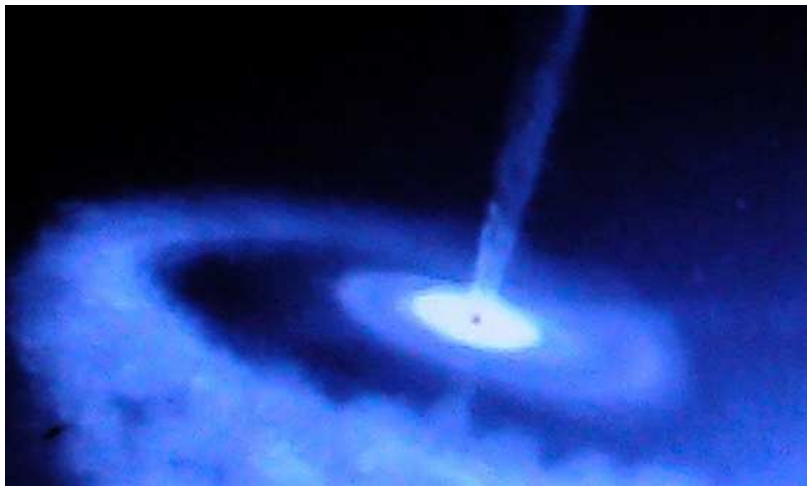

The colour changes and the celestial body looks like burning gas when it enters the proximity of the black hole, which is still active

Inside the black hole matter is completely transformed and is visible as a white light. No astronomer has so far observed star explosions in or near the event horizon, i.e. signs of a Big Bang.

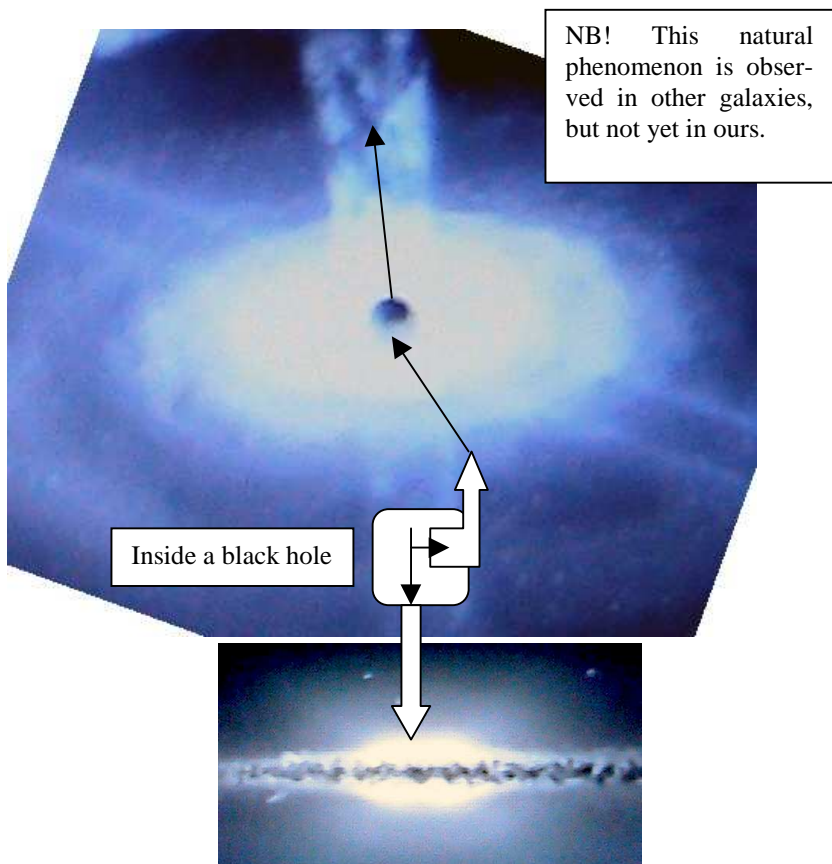

If, in a living star, there is matter which cannot pass the check-point because it is partly outside the approved level of frequency the black hole sends it back in the shape of a whitish beam, illustrated by the pictures.

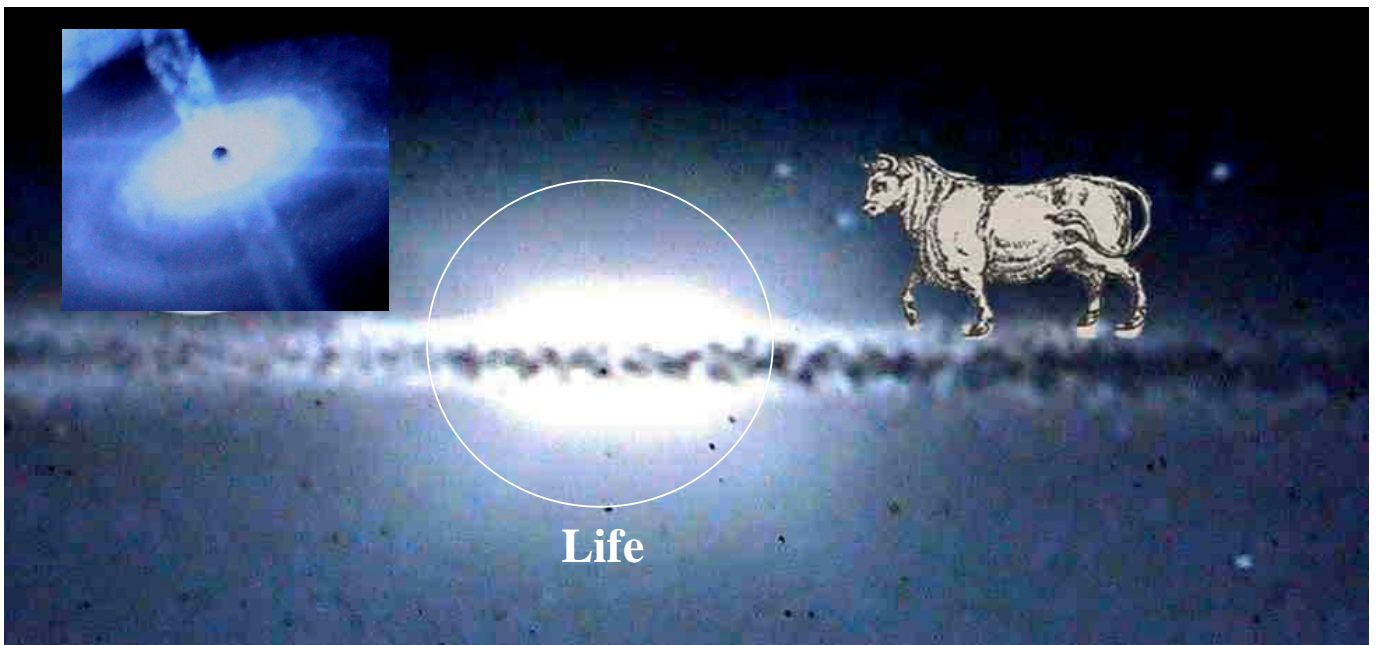

What more do the pictures reveal about the return of unauthorized matter in the form of a white beam? Well, the road to the galaxy's nucleus continues as a similar white beam.

When, for example, a supermassive living star, whose mass is 100 times that of the Sun, enters the event horizon position and starts to accelerate while the fuel in its nucleus is running out, the star continues its voyage round the black hole. It seems to be the case that the celestial body clears the first checkpoint without any difficulty.

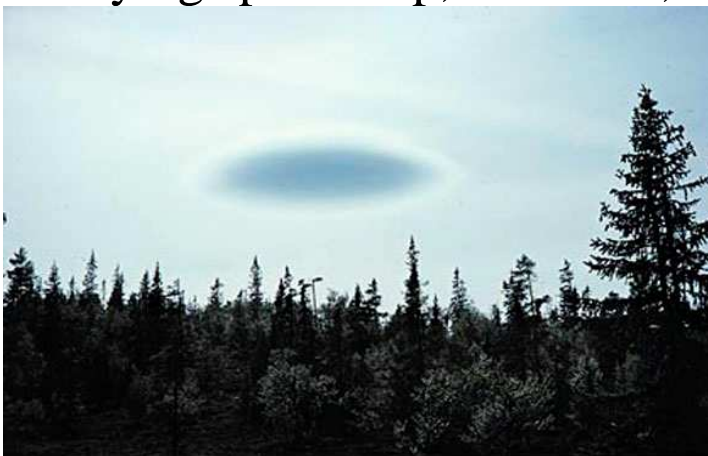

When there is no fuel the star is dying and cannot go on to the galaxy's interior, to the nucleus. Something happens in the black hole. There must be a natural forking of the road which allows living matter to go on in the form of a white beam but which stops and returns dying matter, also as a white beam. In practice this means that there is inside a final, natural checkpoint. Individual or matter, if you are not authorized you will not be permitted. The galaxy's nucleus is of a new kind of matter, unknown to us. More info at ***Voyage Through the Black Hole***. There might be a wormhole in the form of a beam at a certain level of frequency into the interior of the galaxy. If so, it is for human beings.

A white beam in the form of a one-way tunnel or a one-way tunnel in the form of a white beam is the road to the galaxy's, the Milky Way's nucleus. A living star with a minor mass creates a thinner and faster beam, the road to the galaxy's nucleus. A living star with a major mass creates a thicker beam and it takes longer to reach the nucleus. We, here on the Earth, believe that such a trip is eternal if you have joined it. This is called "The Road of Life", exactly as in the gospels. In the gospels, the Lord, Jesus Christ of Nazareth, calls himself "Life" and the road towards it. – It will not be easy for the Lord to travel the Road of Life. For Man there is no big problem, but for a Bull it is worse, even if the Bull is called the "New Man." The finale is inside and not in Church and Faith.

A flying space ship, or saucer, is a copy of a galaxy

Round the edge of the space vessel we can see a white light. With this white light, matter starts to transform into energy or be converted into a different level of vibration. The acceleration is about to begin.

The flying spaceship is converted into another level of vibration. It is a serious acceleration...

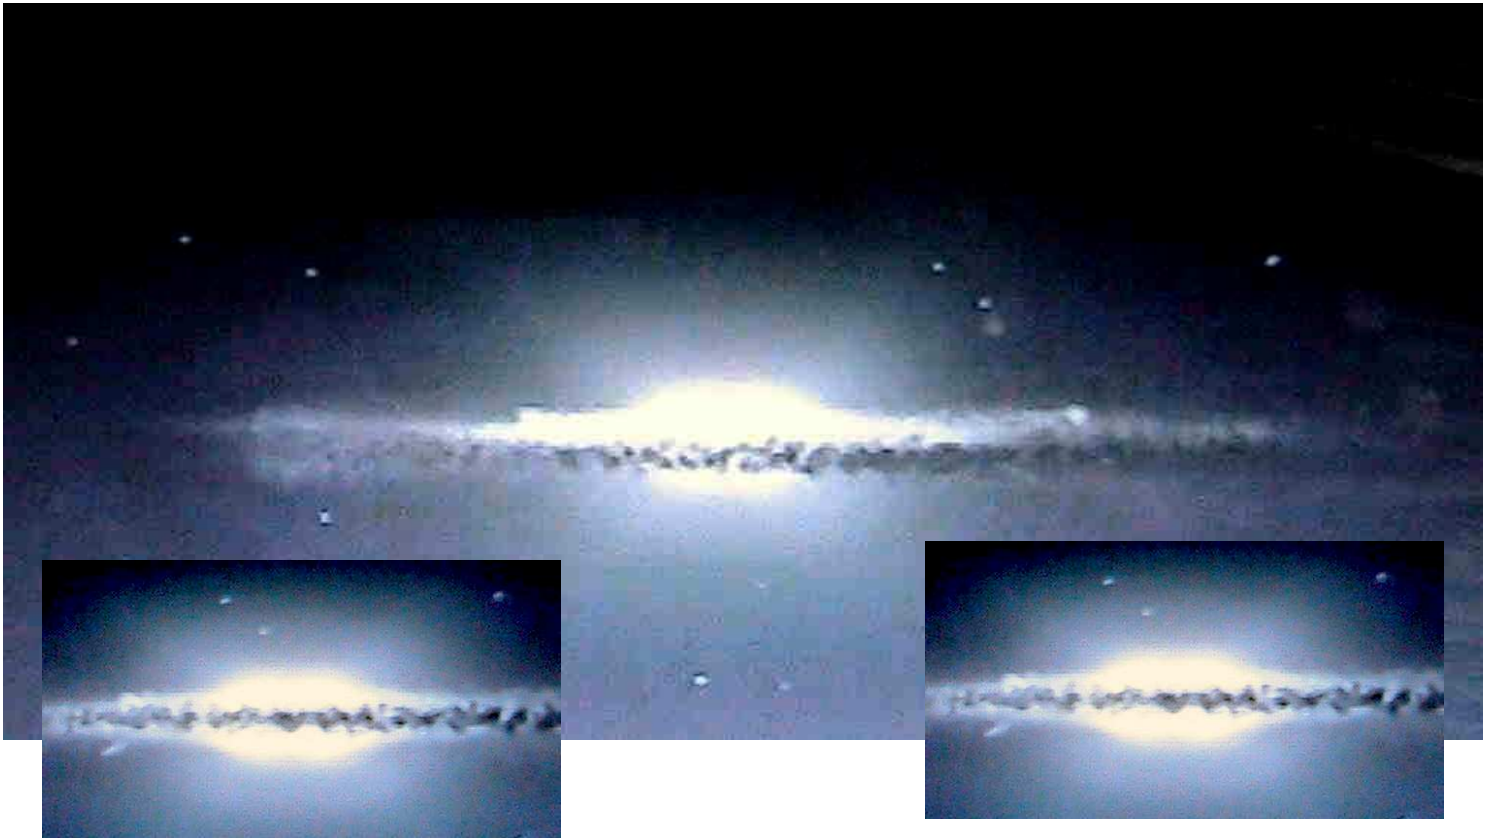

What is left is a white light which keeps its space vessel outline. In other words we see how matter is transformed into another level of frequency...

This is the same, but in a state of flying. We can see the outline of a flying saucer in the shape of a white light. The transformation of matter into another level of vibration takes place immediately.

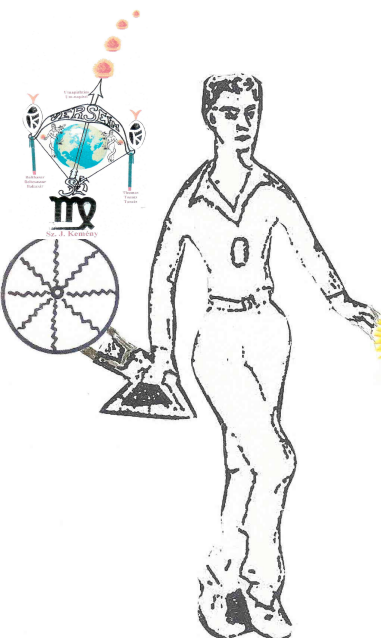

A flying space ship, or saucer, is a copy of a galaxy. This space vessel is principally built according to how a galaxy works. The space vessels can voyage everywhere in our galaxy without any major problems. More info at ***The Battle of the Kingdom of Death***, p 7, and ***What Happens in a Black Hole?***, p 3.

Researchers, scientists and astronomers know what is possible or impossible. It is easier for them to see through the mystery of Life than it is for the flock of religious sheep who believe in things they do not understand nor have any idea about. There is a difference between knowledge and belief. All those who collect knowledge strengthen their personal level of frequency, the believers weaken it.

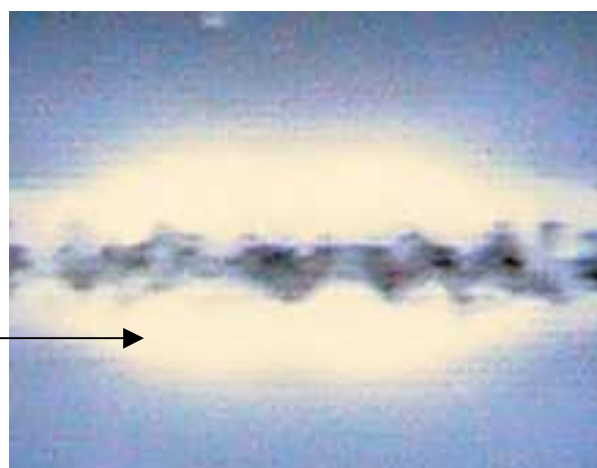

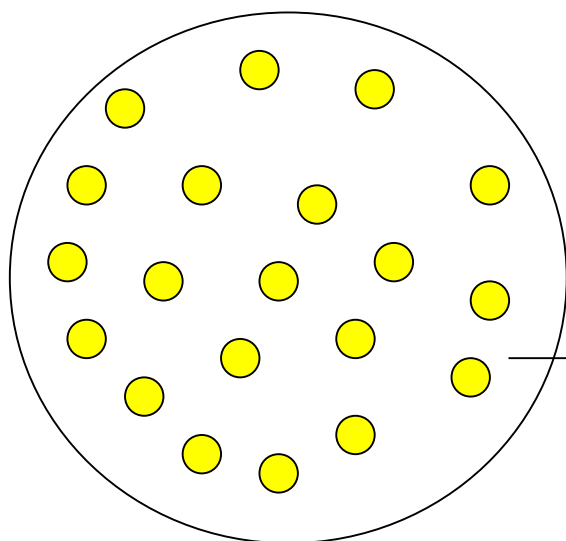

I have followed the development of science since 1967/68, but I have never read nor heard about what is inside the nucleus of the galaxy, the Milky Way. How do you get there? If there is a nucleus there must be life inside it and there must be a way to get there, but science has so far not discussed this. Now, when the black hole is becoming a popular issue in science, it is also getting interesting to have a closer look at the Milky Way's nucleus. More info at ***The Secret of the Black Hole***.

There are many facts about our galaxy the Milky Way in science, but silence is all we hear about its nucleus, its inner world. If this is deliberate or not I do not know, but soon this too will become a popular issue.

Man is the Crown of Creation

Each matter has its own special world of atoms, typical of that world. In the nucleus of a galaxy there is a new world, unknown to us here on Earth. More info at *Voyage Through the Black Hole*. A totally new world, unknown even to science in this context.

Religion implies that God is the omnipotent creator, then He must know about this world. A God who possesses this knowledge does not let himself be fooled by a feather-brain who has neither knowledge nor regal authority. We can see in this context that the Bull God is not any cleverer than the feather-brain. To regard oneself as a human being is one thing, being a human is quite another. If you biologically belong to the human blood group 0, you are a human being. Today you need to be able to prove you are a human being. It is not possible to pretend that God is a human being and, in its shadow, commit lots of crimes. You should prove to nature that you are "Man", not to the flock of sheep which lives in total darkness.

The Bull deity Gilgamesh/Osiris/Ramesses II was the deity of Death and the Kingdom of Death in connection with wealth. In the new, human world, there is only life without wealth. You cannot transfer death to that world, it remains on this planet for now. More info at *The Battle of the Kingdom of Death* and *Life and the Black Hole*.

Thus, each matter in nature has its own purpose with its unique atom world. That very matter, with its atom world (or world of stars) is built according to purpose and final goal regardless of what we believe or know on this planet. Life still goes on, on its own road. (As far as I understand you can move at a special level of frequency via a so-called wormhole at the black hole to a suitable celestial body, but also directly into the interior of the galaxy via a wormhole which has been formed at a special level of frequency in the form of a white beam. This is also called "Road of Life")

Man is the Crown of Creation

Rev. 6:2. " And I looked, and behold, a white horse. He who sat on it had a bow; and crown was given to him, and he went out conquering and to conquer."

(A white horse is a symbol of humans of blood group 0)

Man's World
is created by the
knowledge of
nature

Man is the Crown of Creation

Man is the Crown of Creation
