

The Neutron Star is Here...

by Josef Kemény 08/08/2018

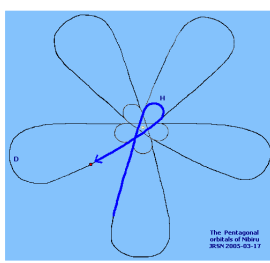

Right now, this is the most important topic in the world. On the web they discuss the fact that the neutron star Nemesis, also called Planet X, has appeared behind the Sun, noticed on some photos. Let me have a closer look at this with my knowledge and some important clues. This picture appeared on the Internet, there are two suns, a binary star system. The picture is very interesting, and it is a good idea to have a closer look at it, to analyse it from a scientific point of view, especially this detail.

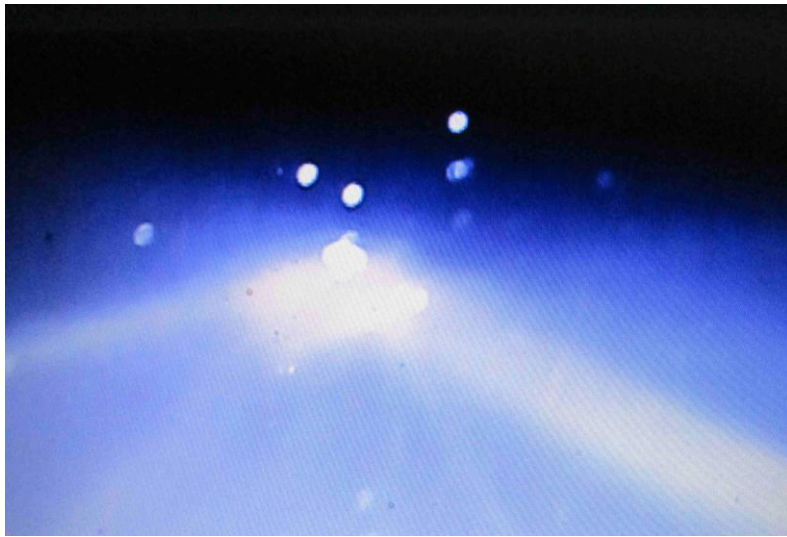

Picture 1 depicts the Sun, we can easily see it. **Picture 2** is again a picture of the Sun, but behind it is a detail of an object. **Picture 3** shows us a round star/neutron star behind the Sun.

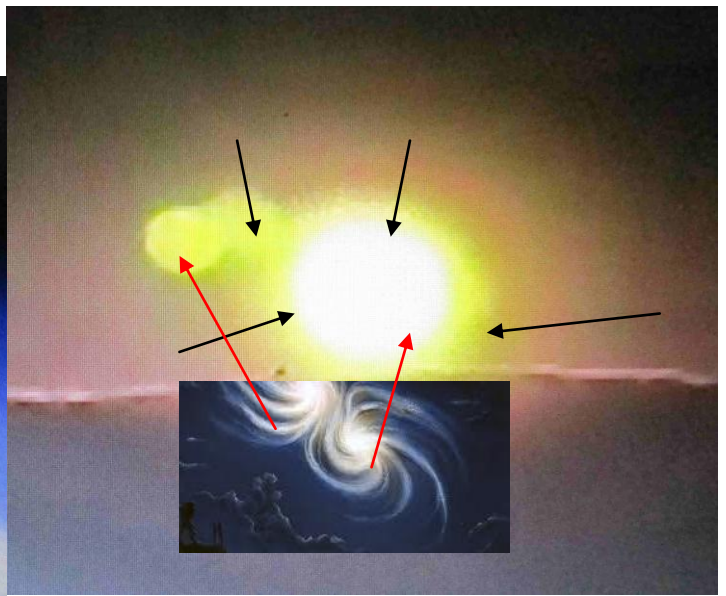

In **Pictures 4, 5 and 6** the Sun throws light upon the neutron star which reflects the rays, so we see one additional object. This very part is interesting. Why does the neutron star reflect the rays from the Sun and why is there an additional object behind the neutron star? This is how I interpret the situation:

This UFO picture depicts 'The Battle of Los Angeles', 1942.

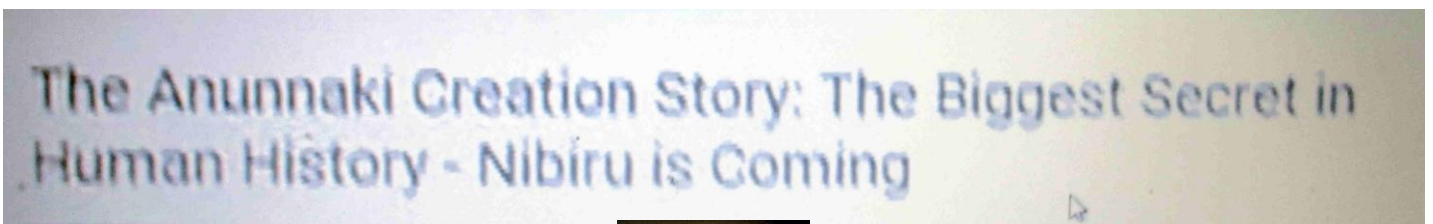

If we zoom in and adjust the light and contrast we may see a condensation in that part of the photo. This might indicate that there is something there, but we cannot detect its shape. It could be moving, it could be transparent. – Analysing the photo seems to have created more questions and mysteries. People have also noticed that some search lights seem to pass right through the object, but some are rejected. Scientists have analysed this aspect for years now. – Is there something in the air which reflects the light? These rays can be mere reflections. They might hit an object and change directions. They are lighter towards the centre, then they become weaker. This may prove that they hit an object. The search lights seem to reflect against something where they gather.

The picture demonstrates how the Sun throws light upon, reflects and affects the neutron star. But the neutron star's magnetic field is much stronger and does not admit the light from the Sun, it rejects it.

We can also clearly see that the same solar light which surrounds the Sun comes from behind the neutron star, i.e. from between the Sun and the neutron star. This reflection from the neutron star is shown by a circular light from the Sun.

There should be one or more object behind the neutron star. These accept the reflection. The only possible explanation are planets which orbit the neutron star and various asteroids, i.e. a tail behind the neutron star forming a comet with its 7 planets. I compare this picture with the UFO picture, 'The Battle of Los Angeles' displayed here.

These are fantastic pictures against a dark but still bright background. The Sun is in a unique situation surrounded by and is about to pass the neutron star Nemesis. Nemesis is of Jupiter's size and we can see from the pictures that the Sun is much bigger than Nemesis.

In this picture we see a binary star system, a proton-proton star with its planets and a neutron star with its 7 planets.

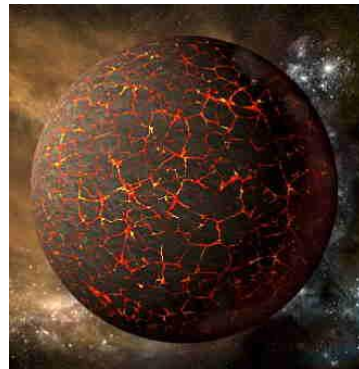

Planet Nibiru, also called Planet X and Planet 12.

Planet Nibiru

Planet Nibiru

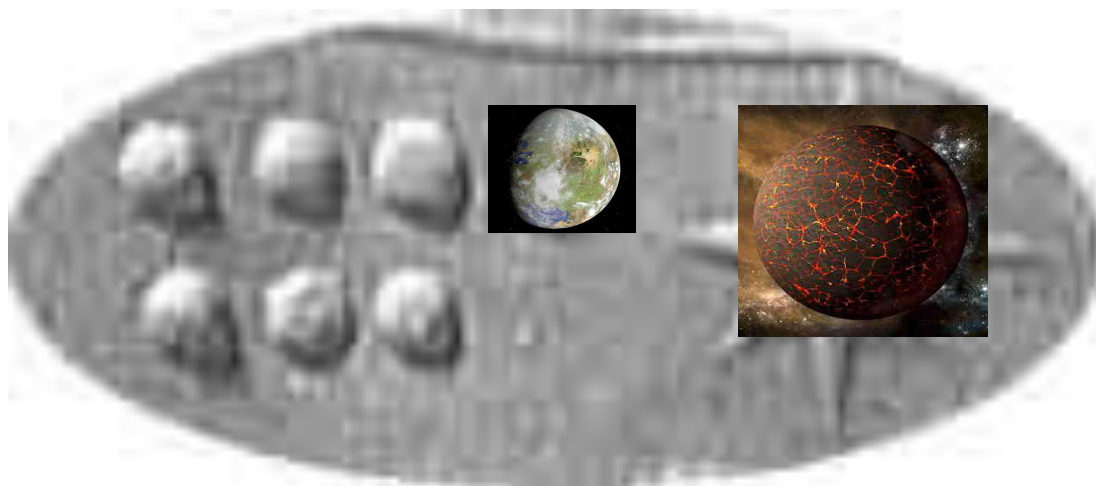

Neutron star Nemesis
A collapsing star

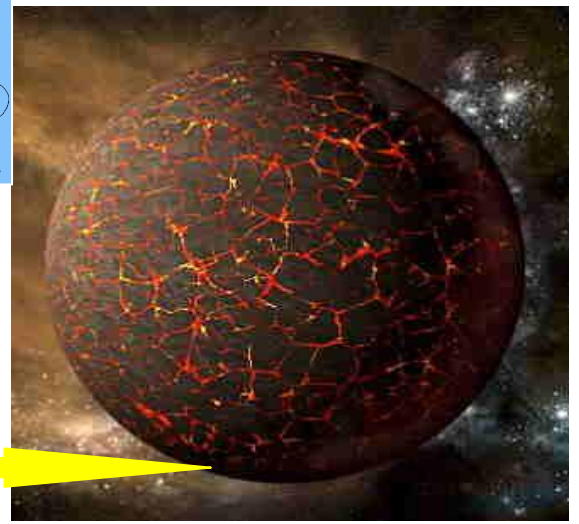

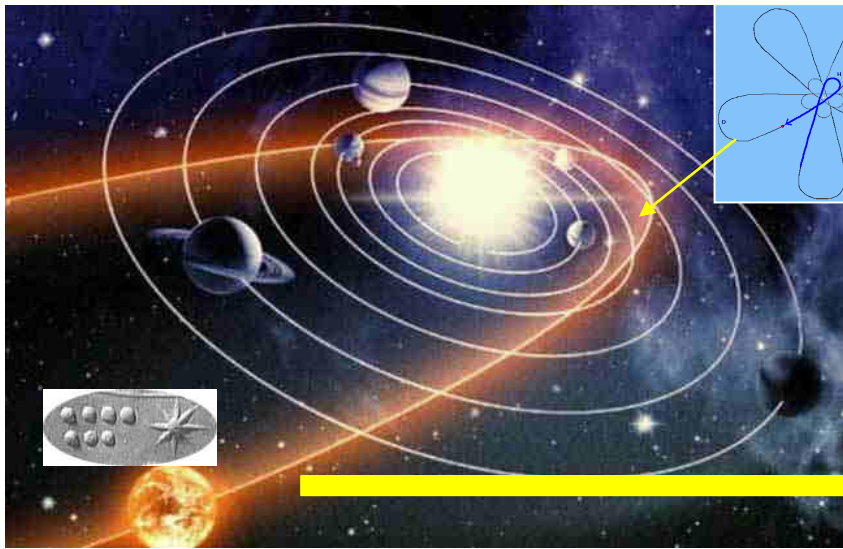

The Earth and Nibiru

When you search for Planet Nibiru on the WWW, you get a bit confused. Planet Nibiru is called Planet X, Planet IX and Planet 12. It is even classified as a star with gravity.

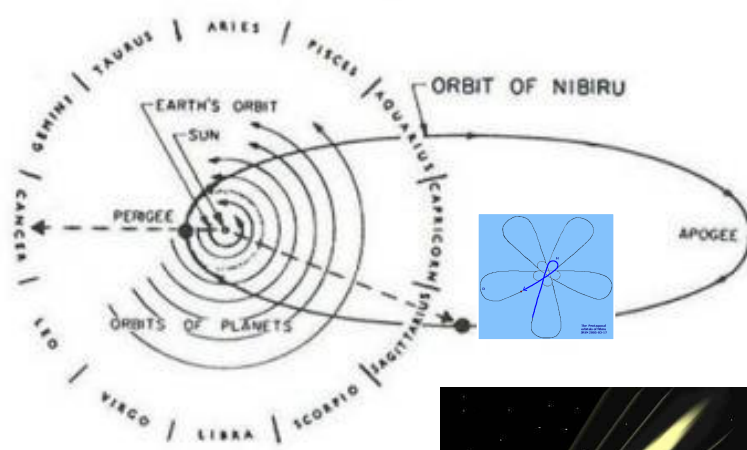

Nibiru is smaller than the Earth. It orbits around the neutron star Nemesis which is also called a neutron star or the dark sun. This neutron star, Nemesis, is a dark brown dwarf sun of Jupiter's size. The planets Earth and Nibiru will never collide. Nibiru sticks to its sun Nemesis and the Earth is content with the Sun. The distance between them prohibits contact.

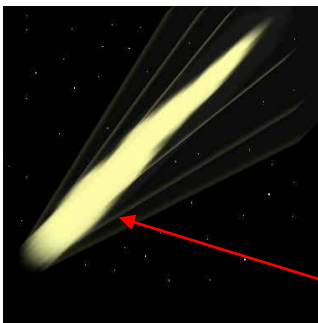

Nemesis with its seven orbiting planets. This neutron star has a stronger magnetic field than has the Sun. This is the cause of global climate change and global catastrophes here on Earth. – There certainly are smaller natural catastrophes on the planets orbiting Nemesis caused by our Sun's magnetic field, but they are smaller and weaker and serve God An/Anu via the population.

The picture above tries to illustrate Nemesis's return to our solar system. We can see that Nemesis does not follow the orbits of the planets, it sticks to its own pentagonal orbit, much faster than that of the planets. But it does not miss the asteroid belt, which means that a large amount of asteroids will accompany Nemesis on its way here. Nemesis is a small solar system but strong compared to that of the Sun. Nemesis's orbital period is around 3,600 years. We previously saw it around the foundation of Israel in the days of Moses and by the fall of Atlantis in the days of Atlas and Zeus. More info at **Industry, Deity**, pp 23 - 29.

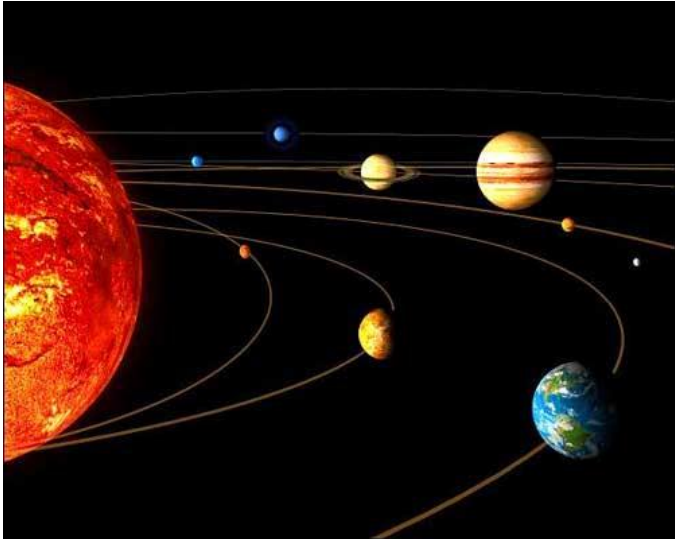

The drawing depicts Nibiru's/Nemesis's orbit in our solar system. Note that here Nibiru is a planet.

The drawing depicts Nibiru's/Nemesis's orbit in our solar system. Note that here Nibiru is a star orbiting the Sun.

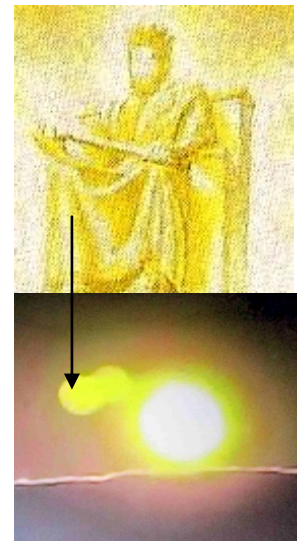

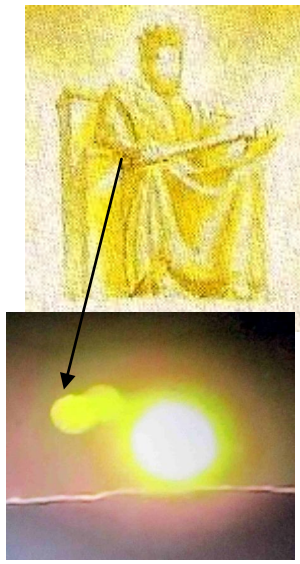

Here, Nemesis is a comet...

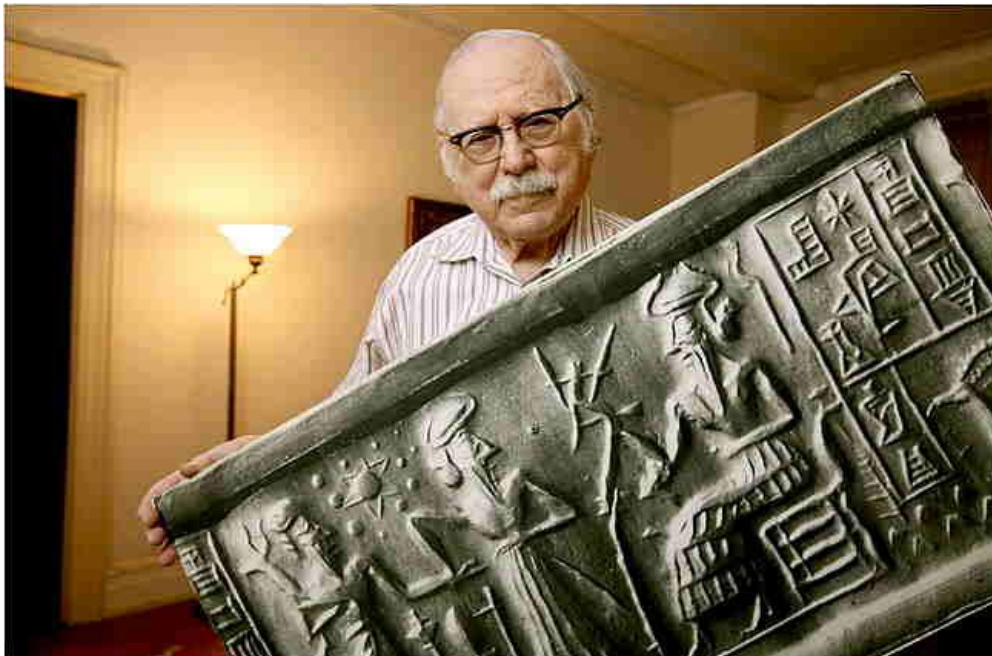

This is our solar system with the Sun at its centre, with planets Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto.

Here we see the planets Jupiter and Venus and at the centre Nemesis as a comet's head, according to Velikovsky.

The Father of Gods, Anu, lives on this planet, Anu from ancient Sumer. We find this in Revelation as well, the God on His throne. Nibiru is also mentioned: New Heaven and New Earth. John (the Baptist) called the world of Nemesis 'the Kingdom of Heaven', one of his messages was 'The Kingdom of Heaven is at hand'. More info at *Science, Life and the Black Hole*, pp 6-9 and *Man's Will*, pp 12-13. See also *Industry, The Falcon does not Fly any More*, pp 1-9.

He devoted his life to illuminating ancient Sumer and its history.

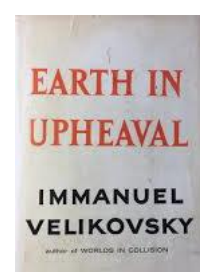

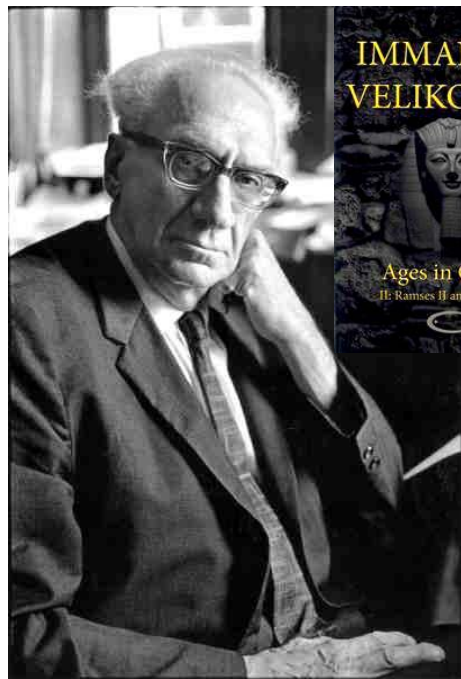

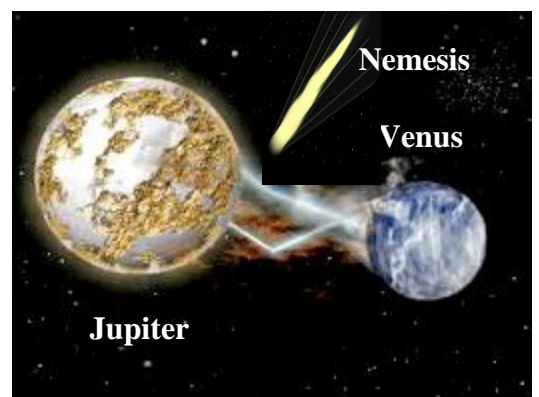

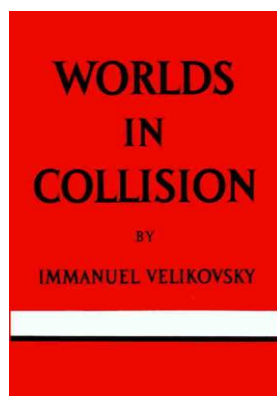

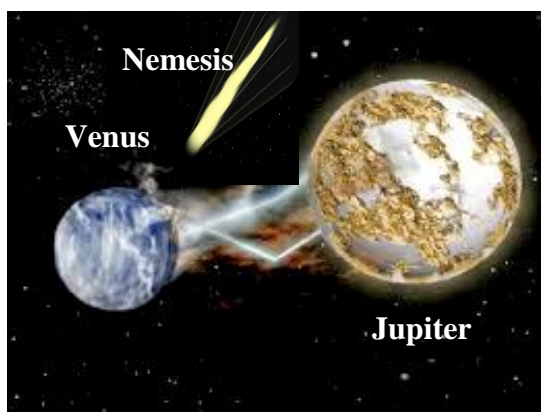

Zecharia Sitchin, 1920 - 2010

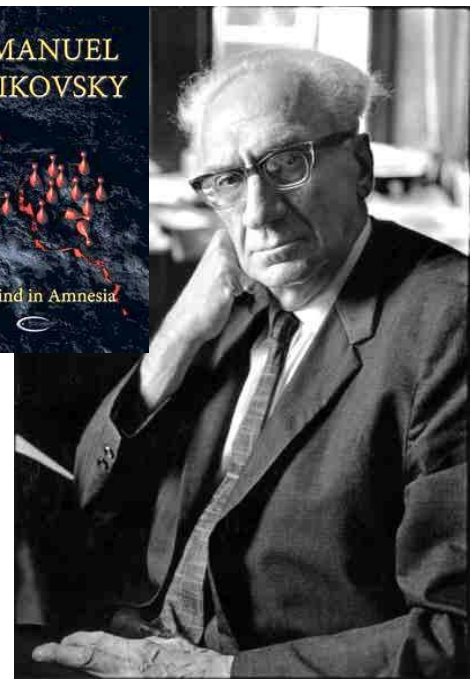

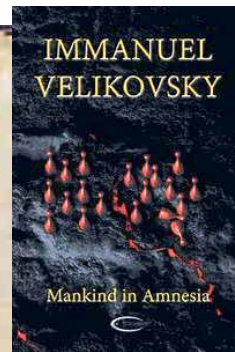

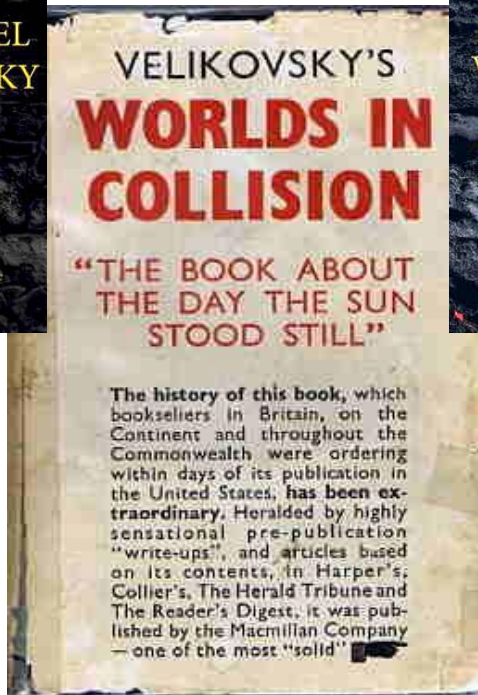

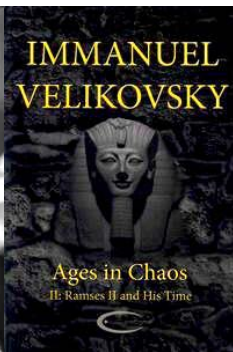

Erich von Däniken, 1935-

In retrospect we can conclude that **Erich von Däniken's** books on God on Gods who come from space are correct, such as *Aussaat und Kosmos*, *Meine Welt in Bildern*, *Spuren und Pläne ausserirdischer Intelligenzen*, *Erinnerungen an die Zukunft*, *Ungelöste Rätsel der Vergangenheit*, *Zurück zu den Sternen*, *Argumente für das Unmögliche*. His level of knowledge is at the top.

Immanuel Velikovsky, 1895-1979

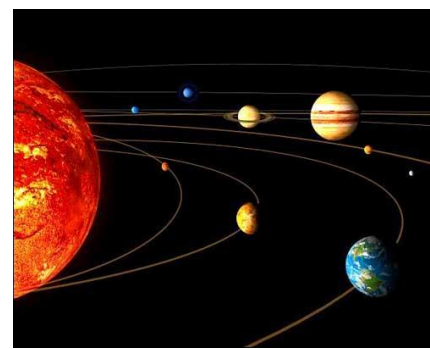

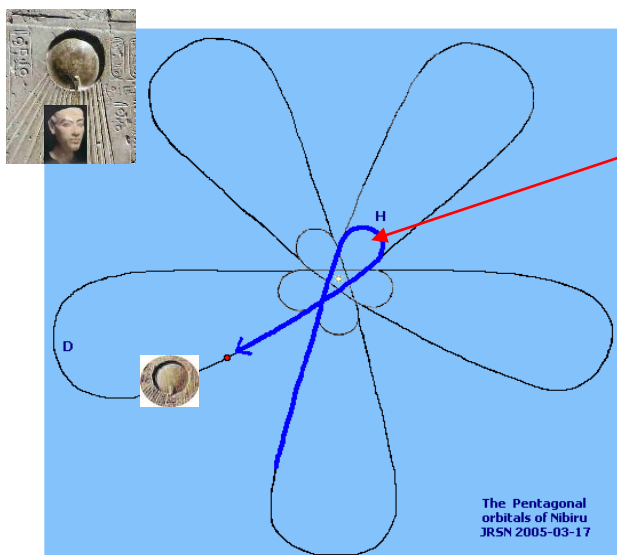

Immanuel Velikovsky, 1895-1979

Worlds in Collision

Worlds in Collision in 1950 by the renowned publisher Macmillan. In his book, Velikovsky maintained that in the 1400s B.C. Venus broke away from Jupiter and passed close to the Earth as a comet. As a result, the Earth's orbit and the inclination of its axis changed, followed by extensive natural catastrophes. Fifty-two years later this happened again. This time the Earth's rotation was halted, followed again by new catastrophes. The Exodus book in the Bible mentions this, according to Velikovsky. (**Exodus 14:21, 16:13-35, 19:18-19 and Joshua 10:12-13**). Planet Mars's orbit had also been affected by Venus and around B.C. 700 Mars approached the Earth with catastrophic consequences. Then the orbits stabilized and became what we see today.

Velikovsky describes the latest return of the neutron star Nemesis, at the time when Moses founded Israel. Pharaoh Ramesses II ruled in Egypt. Simultaneously, the golden days in Greece were over. Atlas also lived on the island which was known as Basileia, Atlantis. More info at Industry, *Deity*, pp 22 - 23 and 29.

To the left we see Nemesis's pentagonal orbit around the Sun, a binary star system. The short orbit, **H**, orbits the Sun from a long distance. On its way here, Nemesis also passes by Jupiter and the asteroid belt. Nemesis with a combination of its strong magnetic field and powerful gravity might find and catch a suitable planet. Velikovsky called it Venus. In the end the Sun's gravity was stronger and it could stop Venus's and Nemesis's further voyage.

Velikovsky describes this situation and the return of Nemesis in his book *Worlds in Collision*. He also writes about natural catastrophes and chaos. In a solar system with binary stars this is what normally happens. – It is an extensive topic and we must understand it properly. The firmament is a gigantic world of atoms for a higher world. – Maya astronomers took great interest in Venus and they studied and tried to predict what will happen the next time Nemesis pays us a visit. Will Venus leave the solar system? More info at **Industry**, *Mayas-Incas-Aztecs and Their Secrets*, pp 8 - 16 and *The Sun at a Disadvantage*, page 2. – We face even worse natural catastrophes. When Nemesis leaves the solar system, it will end up on a shorter orbit, H, see above. – As far as I understand, Velikovsky lived in those days. He knew about the neutron star Nemesis's effects on our Earth and describes what happened. He possessed a high level of knowledge. The Catholic Church is very observant when it comes to Nemesis. We can conclude that **Zecharia Sitchin**, **Immanuel Velikovsky** and **Erich von Däniken** were all great men. .

Malachi Martin,
Planet X 2012
Nemesis

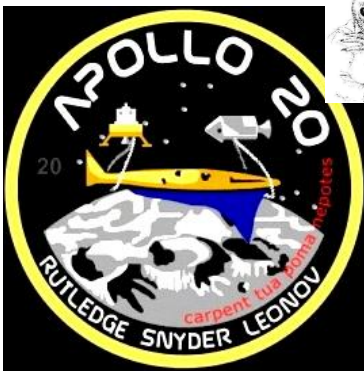

Innocent VII, (1404–1406)
206, 47. From a better star

Pope John XIX's coat of arms carries a symbol of neutron star Nemesis in the shape of a five-pointed comet. Pope Innocent VII's coat of arms also displays Nemesis as an eight-pointed comet. The Pope's motto was **From a better star**, which means he came from the neutron star Nemesis. More info at Industry, *The Maya Calendar and Omega*, page 2.

William Rutledge, 1930-
Apollo 20, commander

Apollo 20's emblem depicts the far side of the Moon,
close to the Izsak D crater, 1976

EBE Mona Lisa
Inanna

On August 16, 1976, **Apollo 20** carried out its stop-secret flight to the Moon commissioned by the DoD and NASA. Commander: William Rutledge, maybe the greatest astronaut in the secret lunar programme. Lunar module Phoenix landed on the far side of the Moon, outside the Izsak D crater, in the so-called City of Knowledge. The crew found interesting items from the days of Sumer, e.g. Inanna's body which was almost unmolested. She got the name EBE Mona Lisa. More info at **Industry**, *Visitors to the Moon, final*, pp 61 - 84
William Rutledge was the commander of Apollo 20. One of his comments on YouTube is: 'The Apollo 20 belongs to all mankind. It is a part of all human's heritage'.
Apollo 20's motto by Vergil: Carpent tua poma nepotes, maybe we are their grandchildren. More info at **Industry**, *The Sun at a Disadvantage*, page 28

In 2007 William Rutledge said to journalist Luca Scantamburlo, among other things, that he feared and worried about **December 21, 2012**. He knew much about Sumerian history and culture and knew that Nemesis was on its way back.

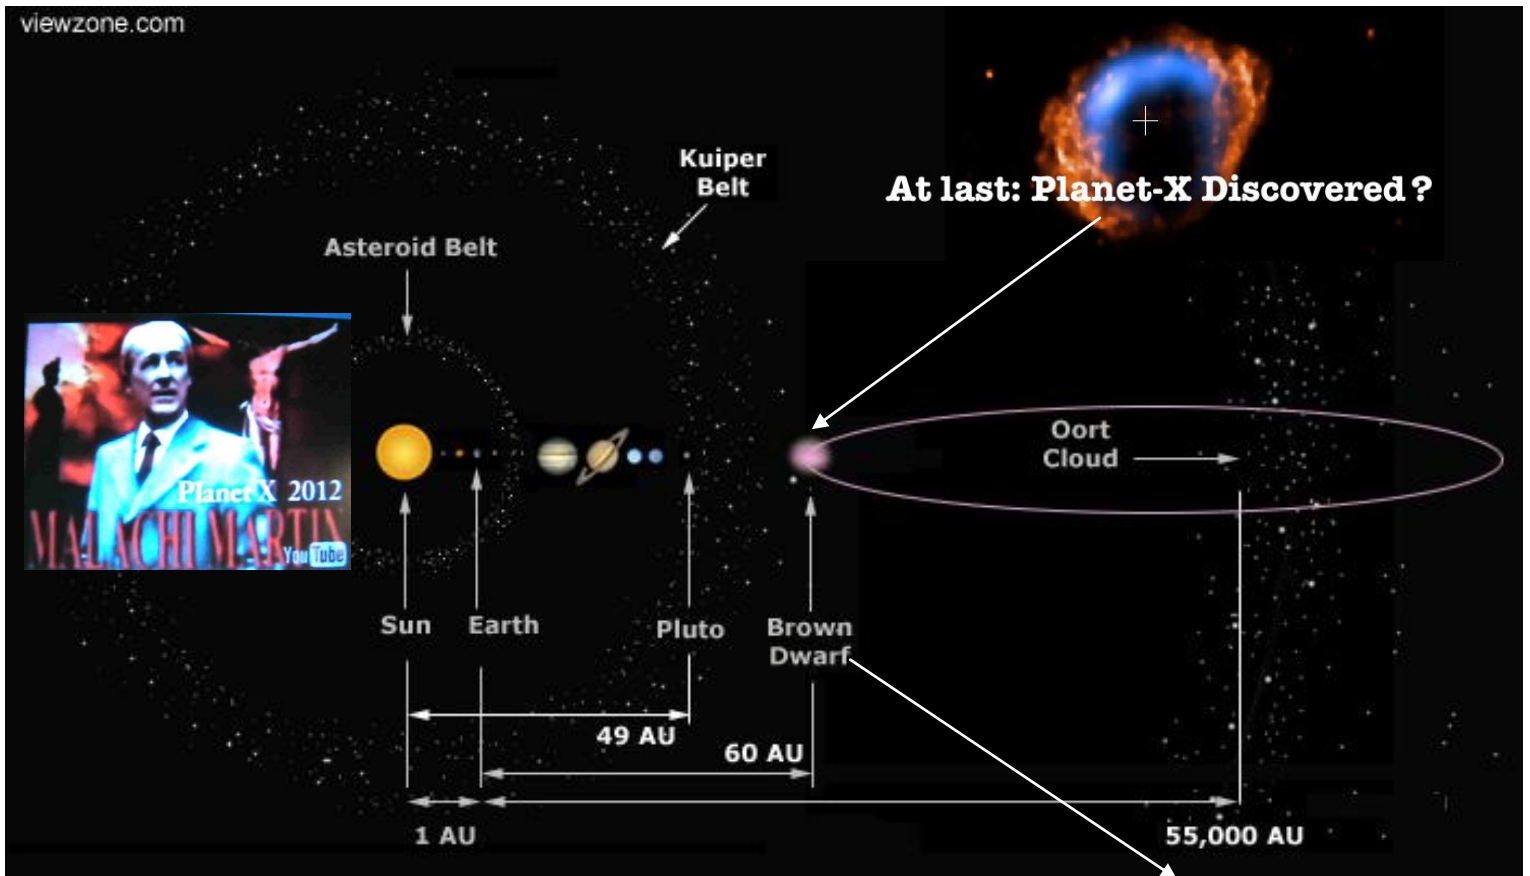

On April 14, 2018, this was on the Internet:

Apr 14 2018 posted to Aliens & UFOs
Pentagon Insider Claims: **'The Anunnaki Will Come Back To Earth'**

Nostradamus, too, writes about the arrival of the neutron star.

Nostradamus - Quatrains
Century 2, Quatrain 41
The great star will burn
for seven days,
The cloud will cause **two
suns** to appear:
The big mastiff will howl
all night
When the great pontiff
will change country.

The neutron star Nemesis, also called Planet X, was spotted by the IRAS satellite in 1983 (NASA, Great Britain and Holland) and last spring it appeared behind the Sun. More info at **Industry, Arrival of the Neutron Star**, page 64.

This neutron star is behind global warming and global catastrophes. The only thing we can do is prepare carefully, using, among other items, my **Survival Project**. This project is rewarded by the British giant **AI Global Media Ltd** the best media company in the world. Planet X—Is It Really Out There?

Shrouded from the sun's light, mysteriously tugging at the orbits of Uranus and Neptune, is an unseen force that astronomers suspect may be Planet X—a 10th resident of the Earth's celestial neighborhood.

Last year, the infrared astronomical satellite (IRAS), circling in a polar orbit 560 miles from the Earth, detected heat from an object about 50 billion miles away that is now the subject of intense speculation.

Possibly as Large as Jupiter

Mystery Heavenly Body Discovered

By Thomas O'Toole

A heavenly body possibly as large as the giant planet Jupiter and possibly so close to Earth that it would be part of this solar system has been found in the direction of the constellation Orion by an orbiting telescope aboard the U.S. infrared astronomical satellite.

So mysterious is the object that astronomers do not know if it is a planet, a giant comet, or a protostar that never got hot enough to become a star, a distant galaxy so young that it is still in the process of forming its first stars or a galaxy so shrouded in dust that none of the light cast by its stars ever gets through.

"All I can tell you is that we don't know what it is," Dr. Gerry Neugebauer, NASA's chief scientist for California's Jet Propulsion Lab-

entury and director of the Palomar Observatory for the California Institute of Technology, said in an interview.

The most fascinating explanation of this mystery body, which is so cold it casts no light and has never been seen by optical telescopes on Earth or in space, is that it is a giant gaseous planet as large as Jupiter and as close to Earth as 50 billion miles. While that may seem like a great distance in earthbound terms, it is a stone's throw in cosmological terms, so close is fact that it would be the nearest heavenly body to Earth beyond the outermost planet, Pluto.

"If it is really that close, it would be a part of our solar system," said Dr. James Hook of Cornell University's Center for Radio Physics.

Clues Get Warm in the Search for Planet X

By JOHN NOLLE WILFORD

When the planet, or whatever it is, is found, it will be a discovery of the first magnitude. It will be the first time since the discovery of the first planet, Uranus, in 1781, that a new planet has been found. It will be the first time since the discovery of the first planet, Uranus, in 1781, that a new planet has been found. It will be the first time since the discovery of the first planet, Uranus, in 1781, that a new planet has been found.

50 billion miles to

World Report, Sept. 10, 1984

Daniel, 12:4 and 12:13

'/.../ But you, Daniel, shut up the words, and seal the book until the time of the end; many shall run to and fro, and knowledge shall increase.'

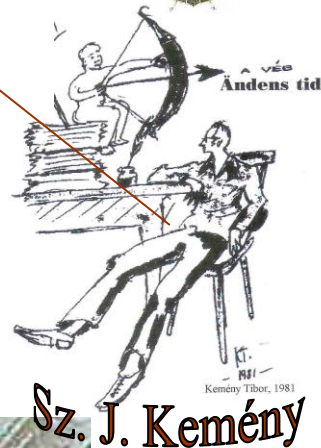

'But you, go *your way* till the end; for you shall rest, and will arise to your inheritance at the end of the days./.../'

End of Time

Finally:

5. Jesus said, 'Know what is in front of your face, and what is hidden from you will be disclosed to you. For there is nothing hidden that will not be revealed. And there is nothing buried that will not be raised.' – Jesus, too, wanted secrets to surface to give the world access to knowledge.

10. Jesus said, 'I have cast fire upon the world, and look, I'm guarding it until it blazes.' 16. Jesus said, 'Perhaps people think that I have come to cast peace upon the world. They do not know that I have come to cast conflicts upon the earth: fire, sword, war.'
